

Meeting Agenda

Date: 2014-04-28

Facilitator:
Erik Risfelt

Participants:
Jacob Turesson
Markus Bergland
Pierre Kraft

1. Objectives (5 min)

2. Reports (15 min) From previous meetings, (un)solved issues, etc.

Erik and Markus has decided that the view and the model will be completely separated. The controller will pass objects from the model to the view.

Pierre has found out how Maven works and tells the group about his findings.

3. Discussion items (35 min)

(a) How do we do...?

Is full MVC truly the best way to organise the application? Might be overengineering

(b) What to do...?

LibGDX supplies a limited event system, it seems, but is it what we want to incorporate?

Maybe make our own event handler

4. Outcomes and assignments (5 min)

(a) Erik should....

Begin preliminary work on SDD

Work on outlining for Event Handler

(b) Markus should...

Begin preliminary work on SDD

Make sure that the RAD stays up to date.

(c) Pierre should...

Add Maven plugins for checking the code quality.

(d) Jacob should...

Start research on libGDX events and how it works.

5. Next meeting?
2014-05-02
